

Complementary Minors & Certificates

The following list of minors and certificates are meant as a starting point for more individualized academic experiences for students majoring in Landscape Architecture. We encourage our students to research the curricular possibilities offered by the university, which includes a far more extensive range of minors and certificates.

*Course substitutions may be allowed by other departments when LA studio course scheduling conflicts with their offerings. Talk to your advisor.

Undergraduate Minors

Community and Leadership Development
Digital Media and Design
Mapping and GIS
Plant and Soil Science

Undergraduate Certificates

Appalachian Studies
Global Studies
Historic Preservation
Universal Design
Urban & Community Forestry

Important note: due to the strict sequencing of Landscape Architecture courses, students pursuing a minor or certificate should be careful with their scheduling. It behooves students and advisors to make a four year plan, checking when courses have been offered in the past (which semester, what times, etc.) to make informed decisions about course scheduling.
